

What's an Integration?

Rewst builds integrations that connect documented processes to automated actions.

Current Integrations

Microsoft Azure	Create, read, update or delete resources using the Azure REST API.
ConnectWise Automate	Perform endpoint management, remote monitoring and IT automation.
ConnectWise Control	Run scripts on your ConnectWise Control Agents.
ConnectWise Manage	Manage contacts, tasks, tickets and more within CW Manage.
Core	Perform general core actions such as awaiting or creating webhooks, making HTTP requests, and sending emails.
CyberCNS	Manage agents, alerts, vulnerabilities and more using the CyberCNS API.
Datto PSA	Organize client information, inventory, billable hours and more using the Datto API.
Datto RMM	Interface with the Datto RMM API.
Duo	Bypass, initiate or set up Multi-Factor Authentication within workflows.
Freshdesk	Create, read and update tickets using the Freshdesk API.
Halo PSA	Perform actions in Rewst: create tickets, sync clients, manage opportunities and more.
HubSpot	Pack for working with HubSpot.
Hudu Documentation	Manage assets, procedures, passwords, and more using the Hudu API.
Huntress	Interface with the Huntress REST API.
Ingram Micro Cloud Marketplace	Purchase products, manage customers, and more.

IT Glue	Perform actions in Rewst based on your existing IT Glue documentation.
Jira	Interface with the Jira API.
Kaseya VSA	Interface with the Kaseya VSA REST API.
Mailgun	Send emails or trigger workflows when receiving emails using the Mailgun API.
Microsoft CSP	Can be used to give Rewst delegated access to organizations managed by a CSP.
Microsoft Exchange Online	Provides access to Microsoft Exchange Online resources (i.e. Mailboxes, Distribution Groups, etc.).
Microsoft Graph	Access data and perform actions in numerous Microsoft 365 products using the Graph API.
NinjaRMM	Interface with the NinjaRMM API.
Pax8	Create, read or update resources in Pax8 such as companies, products, orders or subscriptions.
ProofPoint	Manage organizations and users within ProofPoint.
Rewst	Perform actions directly within Rewst such as creating organizations.
SentinelOne	Manage accounts, agents, forensics and threats.
Sherweb	Interface with the Sherweb API.
Slack	Manage users, send messages, post confirmations and more within Slack.
Twilio	Pack for working with the Twilio API.
Workflows	Default pack: all resources created using the API with no specified pack are saved here.
