

# RoboRewsty AI prompts: Your shortcut to better automation

Think of RoboRewsty as your automation assistant inside Rewst. Ask RoboRewsty for help while building and troubleshooting workflows, and get quick answers on your executions, integrations, and setup so you spend less time searching and more time automating.

Use these examples as inspiration and keep asking RoboRewsty questions to get the answers and support that matter most to your automation work.

## 1 Platform and environment exploration

Use RoboRewsty to explore your setup conversationally: ask about your workflows, execution history, or variables, and get direct answers.

- "What org variables are being used in this workflow?"
- "What integrations are available in my org?"
- "List my recent workflow runs."
- "List recent executions of workflow *[name]*."

## 2 Troubleshooting and managing workflows

Quickly find errors, review logs, and analyze workflow performance.

- What's the root cause of this execution error?
- What does this error mean: *[paste error message]*
- How long does this workflow usually take to complete?
- Explain the purpose of task *[X]* in this workflow.

## 3 Workflow design and build support

Ask for guidance while building your workflows and get practical tips while setting up workflows, Crates, forms, and triggers.

- Is this workflow efficient? Suggest adjustments to optimize task usage and value.
- "What's the best way to set up conditional logic?"
- "How can I add custom fields to this Crate form?"
- "What parameters does the Graph 'create\_user' action need?"

## 4 Integrations and actions guidance

See what integrations and actions you can access and learn how to use them effectively.

- "What PSA and documentation integrations does Rewst support?"
- "Show me the actions available for [integration name]."
- "What are the parameters for [action name]?"
- "What integration actions can help with ticket creation?"

## 5 Jinja and expression help

Get clear, quick help writing and troubleshooting Jinja expressions in your workflows.

- "Help me troubleshoot this Jinja expression: [paste expression]."
- "Why is this Jinja expression failing?"
- "What does the to\_json filter do in Jinja?"
- "Help me write a Jinja template to [specific task]."

## 6 Platform concepts and setup

Learn key Rewst concepts and get guidance for setting up integrations, triggers, and variables the right way.

- "Walk me through setting up the Microsoft User Onboarding Crate."
- "Which Crates can help me automate onboarding with ConnectWise?"
- "What trigger types are available to kick-off workflows?"
- "How do I create dynamic forms that change based on user selections?"

Try these prompts in **RoboRewsty** or book a demo to discover how Rewst can help you scale automation with less overhead and more impact.
